1 Introduction

This deliverable gives details about the Final Conference of the HEO project held on 22 May 2015 at Whirlpool Europe, Cassinetta di Biandronno - Varese.

The final results achieved through the project have been presented. The overall event has included also the final conference on the CIP - Eco Innovation SPRAY project with the specific objective to share the experiences and lessons developed in both projects and spread the debate about the optimal use of resources among an audience of interested in.

During the conference, for both projects a poster has been exposed and leaflets and brochures distributed.

2 Methodologies and procedures

The organization of the conference has involved a set of activities: the setting of the participants, the setting of the agenda, the definition of the topics and the schedule of timetable. For the setting of participants, a mailing list of possible attendees has been selected through the inventory of the

LIFE+ and EU projects databases (Eco-Innovation; Intelligent Energy Europe, FP7). A set of projects dealing with sustainability and the efficient use of resources have been identified and selected. An electronic invitation has been sent to all the coordinators of the Italian Life+ projects and CIP-Eco Innovation projects dealing with environment and the efficient use of resources.

In particular, the agenda was as follows:

The image is a promotional poster for a final conference. At the top, there are two Whirlpool logos. The main title reads 'FINAL CONFERENCE For project (LIFE+) and Spray project (ECO-Innovation)'. Below this, it specifies the location 'Cassinetta di Biandronno, Varese, Italia' and the date '22 May 2015'. A central box contains the agenda: 9.00-9.30 Participants Registration, 9.30-10.30 HEO project, 10.30-10.45 break, 10.45-11.45 SPRAY project, 11.45-12.15 Q&A, and 12.15 closure. At the bottom, there are logos for the European Union and the LIFE+ initiative, along with the text 'Co-funded by the Eco-innovation Initiative of the European Union' and 'PROVISIONAL * CONFIDENTIAL'.

AGENDA	
9.00-9.30	Participants Registration
9.30-10.30	HEO project
10.30-10.45	break
10.45-11.45	SPRAY project
11.45-12.15	Q&A
12.15	closure

3 Results

The concept behind the HEO project as well as its objective, targets and innovative technology have been presented by the project coordinator. Emphasis has been put on the achieved results, either at manufacturing and product level as well as in terms of the environmental benefits envisaged by the HEO in comparison to conventional oven on GWP (Global Warming Potential) and costs reduction.

Almost 20 people have attended the event, including a member of Afros Spa. Afros Spa is the coordinator of the LIFE 11 ENV/IT/000095 CRESIM project. Below, some pictures of the event.
